Vicarage Drove Energy Centre Ltd

Dear Resident

Thank you for your patience thus far as we develop the Vicarage Drove Solar Farm. We wish to make you aware that our specialist contractor, Green Frog Connect Ltd, will be undertaking some essential works on site in the next few days. This will require the delivery of heavy plant and equipment to site along the existing access route. Please rest assured that these vehicles will follow the traffic management systems that we have in place.

The vehicles will be escorted onto site on Thursday 11th September by Green Frog Connect Ltd. These vehicles will travel slowly using our clearly signposted delivery route. The route will be checked by our traffic management coordinators before proceeding but we ask that you keep clear of these vehicles as they make their way to the site and again when they depart.

Once onsite, the plant and equipment will take some time to setup before piling works can commence. The piling operation is likely to take 2-3 days operating within the permitted construction times. Noise levels from the piling works are not expected to be disruptive to residents. Monitoring will take place to ensure this is the case.

We would like to thank you for your continued patience while we carry out this isolated package of work with this heavy equipment. If you have any concerns or queries, please feel free to contact us.

Kind regards
Lisa Wilson
