Technical Appendix A5.3 Illustrative Views

Introduction

1. A number of additional visualisations are provided within this appendix which supplement the assessment by providing an illustration of the effects mentioned at points within the text.
2. These visualisations have been prepared using TrueViewVisuals on an iPad and show the turbines overlaid onto a photograph (taken on site with the iPad). They are matched using existing features within the views as 'markers' and provide a reasonably accurate representation of the likely scale and position of the Proposed Development within the view, but do not meet the standard visualisation guidance. The approximate width of the view shown in each image is 70 degrees.
3. Illustrative Views A to D were agreed during the scoping process, the remainder have been added to illustrate effects identified during the assessment process.
