

Teindland Wind Farm

Viewpoint 6 Earth Pillars Viewpoint

Existing View

This informal viewpoint looks out from a small clearing in the woodland on steeply rising valley sides above the River Spey. Views in all directions except to the west and southwest are contained by nearby rising ground and woodland. Looking out over the River Spey, the forested valley side can be seen rising to form the skyline beyond open farmland and trees interspersed with farms and rural homes within the valley. Pylons and overhead lines cross the view nearby and extend across the valley to the west.

Predicted Change

The proposed turbines would be seen set along the forested skyline looking across the valley and would appear of a similar scale to the pylons crossing the valley in the middle ground. This viewpoint is not likely to be visited at night.

Cumulative

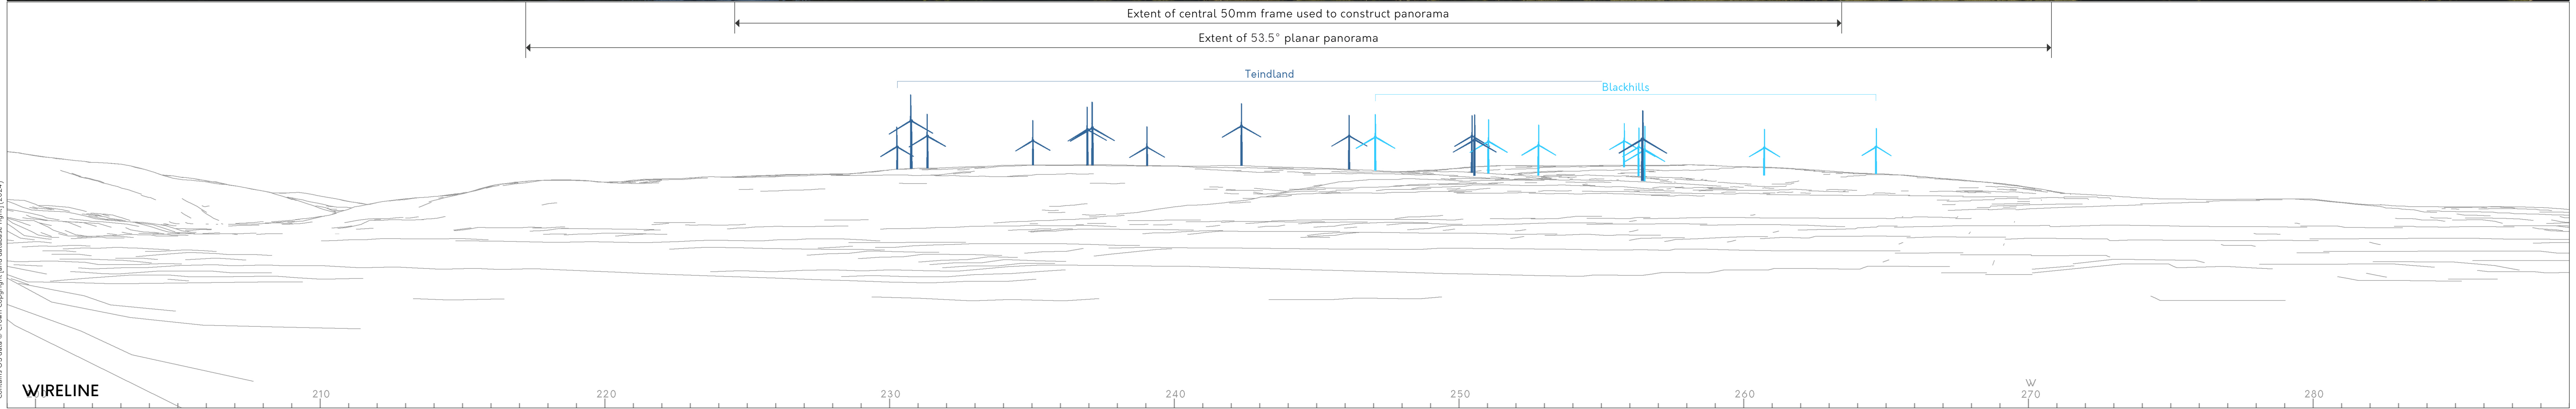

Wind farms in planning would not be visible from this location.

- 90° baseline panorama and cumulative wireline
- 53.5° photomontage
