

Teindland Wind Farm

Viewpoint 10
A941 at Elgin

Existing View

This viewpoint is located along the A941 as it heads south from Elgin. The road is a broad tree-lined avenue at this location and outward views in most directions are contained by roadside trees and housing. To the southeast the road descends away from the viewpoint and more open views are available above the roofs of housing and woodland along the Burn of Linkwood towards a skyline formed by Brown Muir and the lower lying forestry of the Site. The viewpoint is on the top of a grass bank and is more elevated and open than views for southbound road users or pedestrians on the footways.

Predicted Change

The proposed turbines would be seen beyond the skyline formed by the lower slopes of Brown Muir and the forestry, with most of the towers screened by the hillside and some turbines visible only as blades. At night, the lights on T1 and T4 would be seen beyond nearby street lights, and lights in homes and on passing traffic.

Cumulative

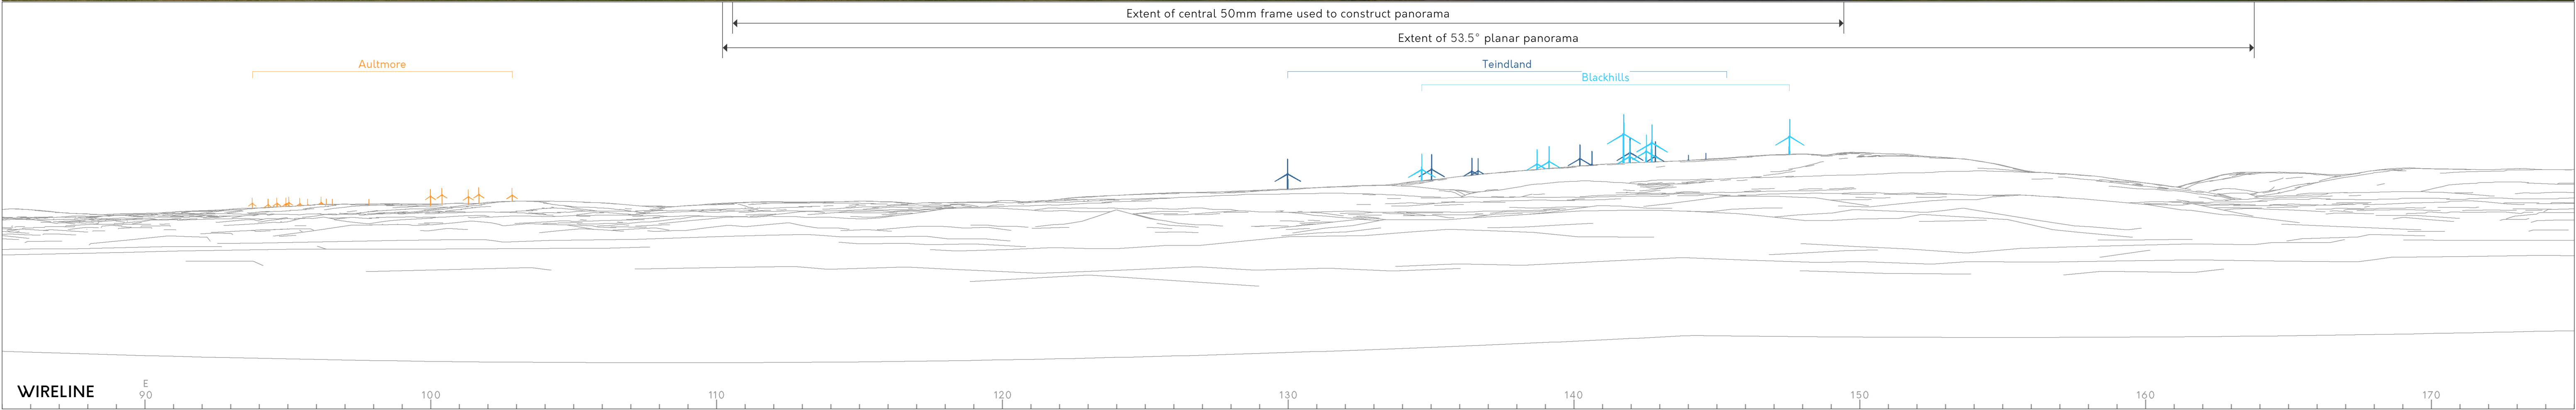

Wind farms in planning would not be visible from this location.

- 90° baseline panorama and cumulative wireline
- 53.5° photomontage
